## Permian Road Safety Coalition (PRSC) Leads Effort to Improve Road Safety in the Region

The Permian Basin region experienced a 17 percent increase in roadway fatalities between 2013 and 2014, according to Texas Department of Transportation crash reports.

The PRSC is a collaborative effort with oil and gas producers, service and transportation companies, non-governmental and governmental organizations to improve road safety in the Permian Basin that began the summer of 2015.

The intent of the PRSC is 1) Driver Focused: share best practices among companies and to develop core operating standards; 2) Road Focused: advocate for improvement to road infrastructure through collaboration with TXDPS and TXDOT; 3) Communication & Education

Register to attend this Thursday's forum by visiting <http://wtxec.org/permian-road-safety-coalition-forum>.
